

M CON PRODUCTS INC.

Why you want to work here

Who we are

We are a one stop shop for all precast concrete infrastructure products. Our philosophy: if it can be poured in place on site, it can be made better if it is precast.

What we make

Circular/box/elliptical concrete culverts, circular/box maintenance holes, catch basins, engineered gravity retaining walls and various other stock and custom products for water and drainage solutions.

Our top customers

Tomlinson, Cavanagh Construction, Taggart Construction.

Our workplace culture

Ours is a busy, friendly company which focuses on ensuring our people have the proper training and support to have a fulfilling career and go home safe each evening.

Career advancement

Career development courses and certification programs available to all staff. Onboarding and positional training sets each employee up for a successful career.

Fun stuff

Annual Christmas party, sports ticket draws, summer BBQs/food truck days. Quarterly challenges and awards. Job tenure awards for every 5 year milestone.

Our values

We are very involved in supporting community events. Our products offer a sustainable option, with less degradation than alternatives. We continuously reduce our environmental impact by improving processes and technologies to decrease waste and increase efficiencies.

We have a unique work environment; our products are varied, and our equipment is specialized. Departments work together to manufacture products to the industry's highest standards. We are continually working to find better solutions and implement the latest technologies.

MEET THE TEAM

Position: Engineering Manager
Name: Brett McChesney, P. Eng. **Age:** 48
Years at company: 10
Educational background: Bachelor of Engineering in Civil Engineering

What do you do on a day-to-day basis at your job?

I record incoming & completed jobs, review & approve production drawings, provide design input to engineers and design information to estimators, provide technical input to marketing, perform quality control and oversee 8 staff.

How did you arrive at your current position? What was your professional or career path?

I was a site inspector with a consulting engineering firm then transitioned to designing jobs. I moved to the manufacturing industry in 2004 and now help produce components for sewer networks I once designed.

What is the best part about your job?

Seeing the finished product going out on a truck, sometimes even the same day! I also get a great deal of satisfaction from mentoring staff and helping consultants with their design questions.

Position: Cage Fabrication Supervisor
Name: Miguel Costa **Age:** 53
Years at company: 35

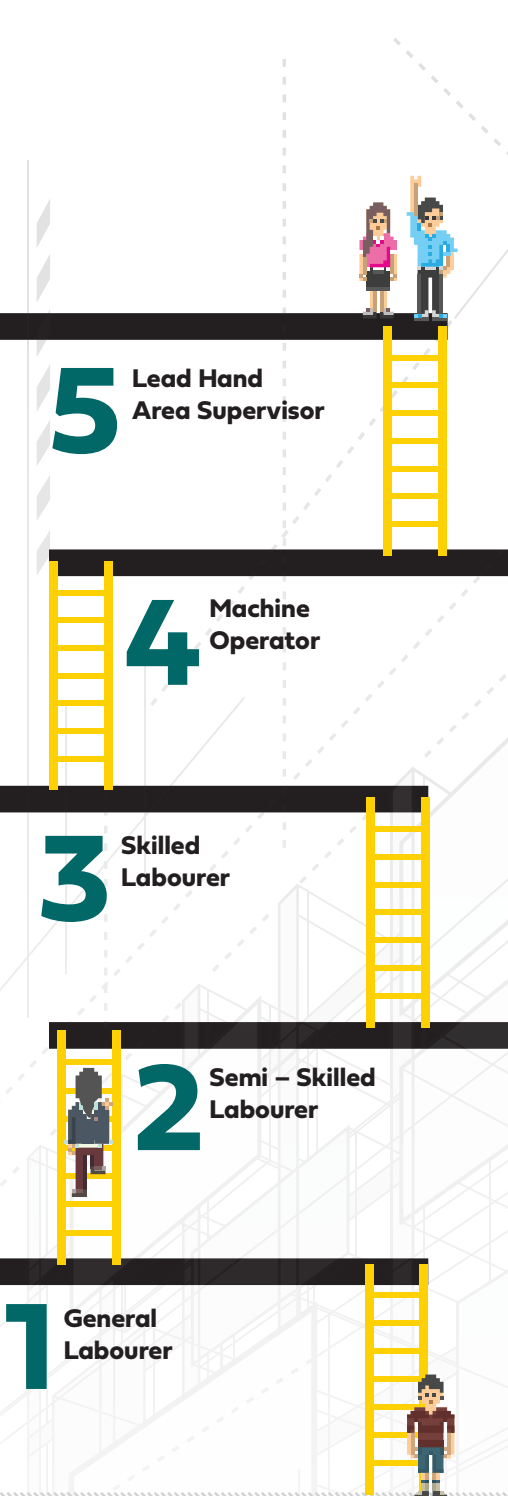

What do you do on a day-to-day basis at your job?

I oversee that the steel cages which reinforce all our products are prepared and ready for production, I assist with production planning and inventory control. I assist with hiring and training.

What is the best part about your job?

Having been at M CON since day one, I'm glad to have been able to progress through various roles and I find the work extremely satisfying because of the value our products bring to key infrastructure projects.
