MANUFACTURING & DISTRIBUTION

M CON PRODUCTS

WHO WE ARE

M CON Products is a local, and family owned, industrial manufacturing facility that was founded in 1989 with roots dating back to 1956. Established in Ottawa, we serve Eastern, Northern, and Central Ontario.

“ We offer job stability, and a place to build a successful career. ”

WHAT WE MAKE

Our precast concrete products include reinforced circular and elliptical concrete pipe, circular and box maintenance holes, catch basins, box culverts, oil grit separators and gravity retaining wall systems.

TOP CUSTOMERS

We serve clients of all sizes. We believe that building a solid relationship with a small contractor just starting out will help them grow their business, just as many large customers today have helped us do after all these years.

Some of our larger customers are Cavanagh Construction, Taggart Construction, Tomlinson, Robert Excavating, and Gordan Barr

OUR WORKPLACE CULTURE

We have implemented 7S lean manufacturing and an everybody matters approach to manufacturing. We believe that putting your people first will contribute to a more satisfied workforce, improve quality, and expand customer base.

CAREER ADVANCEMENT

As we continue to grow our manufacturing facility and operations, we strive to invest in highly skilled professionals who approach each request with a fresh perspective. By implementing a progressive mentorship program, milestone recognition, and conducting scheduled reviews with a development plan, we foster a culture that values continuous growth and improvement.
