

Mayor of Ottawa, Jim Watson Tours M CON Products Production Facility

The mayor of Ottawa, Jim Watson, congratulated M CON Products on their role in some of the city’s largest construction projects over the last 30 years. During the company’s 30th anniversary celebration BBQ, Jim Watson toured the production facility and joined employees, customers, and friends for a bite to eat. The mayor presented Mr. John Mion, President of M CON Products and his team with a congratulatory plaque for 30 years of service to the Ottawa business community and supplying quality product to infrastructure projects in the city. He tweeted, “Congratulations to @mconproducts for celebrating 30 years in the construction industry. Manufacturing pre-cast concrete products M CON has contributed to some of the City’s biggest infrastructure projects.”

The mayor was impressed with the size of the facility and the amount of technology that has been introduced over the years. He also commented on the quality and size of the product, and capacity of the operation to fulfill the needs of Ontario’s growing infrastructure.

Jim Watson (Mayor for the City of Ottawa) presents a congratulatory plaque for 30 years’ service supplying quality pre-cast concrete to Ottawa.

This was the first time a high-profile city councillor toured M CON Products’ facility. The aim was to show Jim Watson where key city infrastructure products are manufactured, and to view the various trades and skilled jobs provided by M CON. The mayor asked insightful questions and showed concern regarding sourcing materials and potential challenges with tariffs and fees. He was pleased with the company’s use of Canadian and local sources. He showed particular interest in employment needs and the skills required for the unique machinery and equipment that is utilized in the yard and plant, as well as concern with the decreasing amounts of skilled trades workers coming into the workforce.

Superiority is a beautiful thing.

You’ve designed the structure. You’ve stamped the plans. And yes, you’ve assumed the liability. So think twice about specifying flexible drainage pipes. Because when you spec flexible a structure has to be built around the pipe. With Forterra reinforced concrete pipe, you buy a structure. Durability. Peace of mind. Not to mention, engineering advice and technical support from experts who have the knowledge to get it right. And that’s a beautiful thing.
